

**ENTERPRISE**  
SOLUTIONS

## What is EcosAgile Workspace?

EcosAgile Workspace is the easy and innovative solution for responding to the **organisational and management dynamics of office staff**. It is the software that allows the booking and management of workstations within company offices, supporting the sharing of spaces and helping the facility manager to respect and optimise working environments in favour of smart workplaces.

EcosAgile Workspace allows **workstations, desks, meeting rooms and coworking spaces** to be booked at any time via the web and display booking system: it provides a real-time view of bookable and occupied spaces and enables precise planning and scheduling of workstations thanks to a constantly updated and clear calendar of room availability, which can be integrated into shared **Google and Outlook** calendars.

With EcosAgile Workspace it is possible to set up **usage policies** by defining groups of users enabled to make bookings according to qualification or function, setting duration and maximum number of bookings to be made over time or setting a maximum number of people in specific rooms.

EcosAgile Workspace also allows you to see the **characteristics, audio and video equipment** and accessories of each workstation, coworking environment and meeting room: it allows you to divide workspaces into **fixed**, permanently assigned to one or more people, **bookable and occupied**.

## Who is it designed for

EcosAgile Workspace is ideal for all companies that work in **coworking** and for companies that manage Personnel within an **agile and distributed working context**, alternating between face-to-face work and smart working.

## Meeting room display device available

## INNOVATIVE solutions

FOR ENTERPRISE

## eMeeting system for booking workspaces and rooms

eMeeting is an indispensable solution for scheduling meetings and business activities that ensures efficient management and booking of company workspaces.

Workspaces include meeting rooms, conference rooms, shared coworking spaces, training rooms and all those areas that can be booked for meetings or other company activities with several participants.

eMeeting is particularly appreciated because it takes only a few seconds to schedule a meeting, to extend it, reduce its duration or cancel it; it also provides in real time the information about availability of meeting rooms through shared calendar and facilitates the choice of the conference room thanks to the room details that contains all the features, accessories and tools available.

Facilitates management of COVID-19 security and control procedures for shared company areas

Clock and calendar containing details for each meeting, its duration and participants

### POST COVID-19 MEETINGS MANAGEMENT

eMeeting maximizes the use of the available workspace, ensuring the number of participants does not exceed the limit, the duration of stay is observed and it also facilitates the distance required by COVID-19 security procedures. The detailed statistics on room usage and saturation (hourly, weekly, per person, per meeting room) is available for company management.

### REAL TIME AND CLOUD

Thanks to a simple Wifi or Ethernet connection eMeeting is integrated in real time with the EcosAgile Cloud booking system to offer full functionality and data access via web from anywhere.

### DISPLAY TOUCH SCREEN

eMeeting improves productivity: thanks to the display there will be no more interruptions of meetings, no one will disturb you during the meeting or "stole your room". It guarantees efficient booking management with just a few clicks by the organiser, in compliance with safety standards which are secured by NFC badge recognition or by a unique access code.
